CLASSIFICATION

Previous to 1922 each Branch of the Department of Agriculture had its own system of classifying its publications. A new classification instituted at that time consolidated the publications into a departmental system. This classification, designated the New Series, includes circulars, pamphlets, and bulletins according to size and importance, and a fourth series covering acts, orders and regulations. Each of the four series is numbered consecutively from one upwards. The reports of the Department are issued as in the past.

FILING THE PUBLICATIONS

The Publications Index Book listed on Page 12 of this pamphlet shows a simple system of classifying the publications for future reference and study. The system provides for numbering and filing the publications as they are

received. To preserve the booklets in standing position filing cases are required, or they may be placed on a shelf and blocked at each end. The illustration shows two filing cases containing thirty pamphlets that are listed by subjects in the thumb-indexed ruled pages of the Index Book. The system in use constitutes a valuable farm library.
